

*Sa Gruta de Santu Giovanni*

PROGETU IMOI ETOTU 2

An aerial photograph of a rugged, rocky landscape. A path made of light-colored stones winds through the terrain, which is covered with green grass and patches of bare earth. The path leads from the bottom left towards the upper right of the frame.

In sa localidadi de Santu Cosmu, a cincu chilometrus de Gonnos, s'agatat unu monumentu archeologicu de importu mannu, sa Gruta de Santu Giovanni, de s'edadi de su brunzu mesanu, intra su de cuindixi e su de catòdixi sèculus innantis de Gesù Cristu.

Est una de is tumbas de is gigantis prus mannas de Sardigna. Is primus sgavus ddus iat sighius Giovanni Ugas in su 1981.

Meda de su chi ant agatau in custa àrea archeologica s'agatat oi in su museu archeologicu de Sàrdara.
